LinkedIn: linkedin.com/in/kinnera-naveen-1786ab2b6 | GitHub: github.com/KinneraNaveen

OBJECTIVE

Computer Science student skilled in Java, OOPs, SQL, and the MERN stack, with hands-on experience building scalable web applications. Eager to contribute to impactful software solutions and enhance backend and database development in a dynamic Software Developer role.

EDUCATION

Kalasalingam Academy of Research and Education, Krishnan Koil **2022 – 2026**
Bachelor of Technology in Computer Science and Engineering (**CGPA** – 8.2/10.0) [*Virudhunagar, T.N.]*

Sri Chaitanya Junior College **2020-2022**
(**Percentage**: 94.%) [Nellore*, A.*P]

S.S.C ZPHS SCHOOL **2016 – 2020**
Secondary School Certificate (Percentage: 83.3%) [Marripadu *, A.*P]

SKILLS AND INTERESTS

- **Technical Skills:** Java ,SQL, Python
- **Soft Skills :** Team Work, Time management, Communication
- **Libraries /Frameworks:** React Js , Express Js ,Node Js
- **Areas of Interest**: Data structures and Algorithms, OOPS , Database and management systems, Web Development
- **Tools/Platforms**: VS Code, Google colab ,GitHub, Postman , Jupyter Notebook

PROJECTS

Healthcare Support for Rural Areas Website
- Developed a multilingual platform providing healthcare suggestions for rural communities. Link
- Integrated Gemini API to provide AI-powered health suggestions and real-time chatbot assistance.
- Implemented a backend with MongoDB for secure and efficient storage of user and health data.
- Developed multilingual interface using efficient frontend technologies to ensure continuous access to healthcare information.
- **Exposure:** MERN Stack , HTML,CSS, GEMINI API

Hospital Bed Fall Detection and Alarm System
- Designed and implemented an AI-powered fall detection system to enhance elderly safety by detecting falls in real time. Link
- Improved safety by developing a real-time fall detection system, reducing emergency response time by 40%.
- Optimized real-time image processing using OpenCV for accurate fall detection.
- Streamlined care coordination by integrating automated alerts to notify caregivers instantly when a fall is detected.
- **Exposure:** Python, OpenCV, YOLO V10 , Machine Learning

E-Commerce Website for Farmers | MERN Stack
- Developed an online marketplace that connects farmers directly with buyers, increasing farmers' sales by 30% and cutting out middlemen Link
- Built an easy-to-use platform for farmers to showcase and sell their products, improving accessibility to a larger customer base.
- Implementing a secure authentication system and product listing approval process
- Integrated an AI-powered chatbot to provide real-time assistance, improving customer support and enhancing user experience.

CERTIFICATIONS & ACHIEVEMENTS

- Full Stack Web Development, Udemy (2024) | Java with DSA, Apna College (2025) Link
- Hackathon Finalist: Ranked in the top 10 out of 200+ participants (2024) for developing an AI-driven solution.

LANGUAGES &ACTIVITIES

- English (Professional), Telugu (Native), Hindi (Intermediate)
- Actively participating in Leet Code contests, coding competitions, and hackathons.
- Continuously exploring emerging technologies and industry trends to enhance skillset.
